Abstract (en)
[origin: EP1113220A2] The operation lamp comprises several reflector units (6) and at least one reflector unit is swivelable using a swivel unit which is operated by a swivel operating unit (19). The lamp is designed, so that between the swivel unit and the swivel operating unit, a Bowden cable (14) is arranged, for transmitting a movement exerted at the swivel operating unit (19) on the swivel unit for swiveling of the one or more reflector units (6).
