Abstract (en)

A separating device of the wires (3a, 3b) without sheaths of a cable (2) consists of a wedge-shaped push rod (12) located near the end of the cable (2); the push rod (12) moves from a first to a second position and vice versa; when the push rod (12) is found in the first position the wires (3a, 3b) are not separated; vice versa, when the push rod (12) is found in the second position the wires (3a, 3b) without sheaths are separated for examining their physical characteristics. <IMAGE>
