Abstract (en)
[origin: WO0016752A2] A method is provided for treatment of a condition of an epithelium of a subject, the condition is for example inflammation, insect bite, allergic reaction burn, sun burn, eczema, edema, acne, dry skin, oily skin, malodor, abrasion, incision, and bruise, the method comprising applying proximate to the epithelium of the subject a device for cosmetic aromatherapy treatment of the subject, including an aromatherapeutic composition in a polymeric matrix, the device having a skin adhesive. In another embodiment a composition is provided for aromatherapy, comprising an essential oil in a polymeric matrix in a container with a suitable vehicle, such that upon delivery of the composition from the container and application to the skin of a subject, evaporative loss of the vehicle from the composition results in formation of a film.
