Abstract (en)
[origin: DE10000163C1] The casing has a casing body (1) and a connection unit (2) to fix the rear wall of the casing body to a door or window frame (3). The connection unit encloses a space between the casing body and the window frame having a defined width (B). Preferably, the connection unit connects the head side of the casing body to the window frame and is formed as a hollow profile that is connected to the casing body on one side and the frame on the other side.
