Abstract (en)

[origin: US2002020424A1] A system for applying a product to at least one of eyelashes and eyebrows may comprise an applicator comprising a stem and an application element at an end of the stem. The application element may be configured to apply a product to at least one of eyelashes and eyebrows. The application element may comprise a support and at least one row of teeth extending from the support. Each of the teeth may have a free end, a root portion adjacent to the support, and a lateral surface extending from the root portion to the free end. The lateral surface of at least some of the teeth may include at least one of a region having a relief and a region having an angular portion. The system may also comprise a receptacle configured to contain the product and a wiper member configured to wipe excess product from the application element when the applicator is removed from the receptacle. Also provided are methods of applying a product to eyelashes and eyebrows.
