Abstract (en)
[origin: WO0016670A1] The invention relates to a system for installing floor carpets, comprising a carpet whose nap side (1) forms the useful surface and anchoring means (7) that can be fixed to the floor, said means having protuberant interlocking means (11) that interlock with the backside (5) of the carpet opposite the nap side. According to the invention, the backside (5) of the carpet facing the anchoring means is formed by a material having no loops and a micro-adhesive closure (7) with interlocking elements in the form of fingers (11) that have thickenings (13) on the end side is provided as interlocking means, which interlock with the loopless backside (5) of the carpet.
