Abstract (en)

[origin: WO0018877A1] A detergent composition which has improved solubility or dissolution in laundering solutions, especially in solutions kept at cold temperatures (i.e., less than about 30 DEG C), is provided. The granular detergent composition is aesthetically pleasing to consumers and has improved flowability. The granular detergent composition has a homogeneity number of greater than 1 wherein the homogeneity number is defined by the equation $HN = X_{bulk}/X_{part}$. A process for producing the detergent is also provided.
