Abstract (en)
The device (1) is capable of regulating the length of the string of a necklace (6) of the type provided with a chain or other filiform support of a pendant for ornamental use produced in the jewelry field and costume jewelry such for example a "collino" which is a thin chain to be used around the neck to which a little medal (9) or a little cross can be hanged on, a bracelet, an earring and similar products. The device has a particular conformation of the means capable of regulating in the desired manner the length of the chain or the other filiform structure. <IMAGE>
