Abstract (en)
[origin: US2001007255A1] Test head for respirator and diving masks with a shape approximating the human head and having at least one air duct traversing the interior of the test head. The test head includes an opening, preferably in the area of the mouth, to which one end of the air duct is attached while the other end can be connected to air supply or measuring equipment. The air duct includes a stopper element for selective pressure-tight closing of the air duct in an area of the test head.
