Abstract (en)  
[origin: EP1116679A2] The device consists of a locating mark for the plate and stops (20) which guide the front edge of each plate section up to the hand over region where they are passed on to the locating marks for printing or coating. The locating mark (15) is located on a large drum at the forward end of the machine, while the stops are positioned on a conveyor belt behind.
