Abstract (en)

[origin: WO0108807A8] The invention relates to a device for effecting the automatic imbalance compensation of the rotor (5) of a centrifuge. The inventive device comprises a compensating ring (8) which, via an elastic bearing device (9), can be concentrically mounted in an inoperative position on a concentric surface of the rotor. The invention is characterized in that the bearing device is designed as an at least radially non-rigid elastic ring.
