Abstract (en)

[origin: EP1118559A1] The assembly consists of two rigid metal side members (1, 2) of C- or I-shaped cross-section, with vertical elements (7) and top and bottom flanges (8, 9) providing cavities for the installation of electrical cables. The side members are connected by cross-members (6), some of which can be trough-shaped to receive electrical cables. Smooth panels (16) are mounted on top of the side members, and a conveyor belt has its upper section (25) passing over the panels, while its lower section (26) is supported by freely rotating rollers (27). In addition, the upper section of the belt passes between vertical panels (17) fixed to the side members' top flanges.
