Abstract (en)
[origin: EP1118714A2] The machine (F) has a chassis (1) which has a material bunker (B) located on the front behind which is located a primary drive source (P) and a drivers cabin (A). A longitudinal conveyor (C) is provided in the base of the bunker and passes backwards through the chassis. A removable personnel support surface (W) is provided above in the bunker above the conveyor. The support surface is located near the rear wall (4) of the bunker and is in the form of a flap which can be tilted downwards.
