Abstract (en)
[origin: EP1118723A1] The central portion of the plug (16) is slightly mushroom-shaped so that it may be used as a handgrip for lifting up the plug. The central portion is surrounded by a deep-drawn skirt (7) with apertures (20) through which the waste water can flow. There is a sealing ring (10) around the central portion of the plug which presses against the rim of the drain opening, which lies in a bowl-shaped depression under the skirt of the plug. The plug has a central shaft (9) which is held in a bearing (22).
