Abstract (en)

[origin: EP1118816A2] The oven has an internal combustion chamber, a device containing a choke (41) with a valve element (42) for exhaust gases, a choke drive (43) and at least one probe (44) and a device with a regulating circuit for regulating the choke in accordance with a signal produced by the probe, which is mounted directly underneath the valve element of the choke. Independent claims are also included for the following: an arrangement for an oven with a regulating circuit.
