Abstract (en)
[origin: EP1118819A2] The cover (12) has at least one opening (10) for sucking in and blowing out air and is fixed to the ventilation unit (1) by an intermediate frame. The cover is next to the ventilation unit in an axial direction and is deep enough to enclose the majority of the protruding part of the ventilation unit. The cover rests almost directly against one surface (2b) of the wall.
