Abstract (en)

[origin: EP1118826A1] The inner shell (6) and outer shell (7) are joined together at the edges by overlapping flanges at 90 degrees to the plane of the door (5). The chamfered portion (11) of the inside edge joins a straight portion (9) and the seal (12) consists of a blister strip in the region of the 135 degrees bend between the chamfer portion and the straight end portion. The space between the two door panels is filled with foam material (19).
