Abstract (en)
[origin: US6530871B1] A centrifuge, comprising: a centrifuge basket for separating a fed substance to be centrifuged into different constituents; a receptacle surrounding a portion of the basket; a bag insertable into the receptacle, the bag having an exterior wall and an interior for catching at least a portion of the constituents delivered by the centrifuge basket; a space surrounding the bag; and wherein the interior of the bag near an axis of rotation of the centrifuge basket is connected by a hose with the space surrounding the bag. A method of operating the centrifuge including the steps of mounting the receptacle, feeding the substance to be centrifuged, rotating the centrifuge basket and catching solids in the bag while separating the solids and liquid.
