Abstract (en)  
[origin: WO0013985A2] The invention relates to a container system for food, especially for deep-frozen food, comprising individual containers, each of which has its own individual lid, wherein the container system has at least one additional lid for selectively blocking or releasing the individual lids by means of a device for receiving and retaining the additional lid. Said container system can advantageously be used in households, catering establishments, restaurants and in retail and wholesale trade.
