Abstract (en)

[origin: WO0021249A1] A communications center (102) capable of communicating with an SCU (selective call unit) (122) over a plurality of communication media includes a transmitter (203, 218) and a processing system (210) coupled to the transmitter. The processing system is adapted to generate a message (402), choose a selected one of the plurality of communication media according to the content of the message (404-410), and cause the transmitter to transmit the message to the SCU over the selected one of the plurality of communication media (414).
