Abstract (en)

[origin: WO0020986A1] A high performance network interface card (HP-NIC) (102) comprising a first interface that connects to a first computer (101), a second interface that connects to a second computer (104) via at least two fiber optic links (110, 111), an HP-NIC communications software (HP-NIC SW) that transfers information between the first computer (101) and the second computer (104). This transfer is accomplished by sending and receiving Dense Wavelength Division Multiplex (DWDM) Laser signals across the at least two fiber optic links (110, 111).
