Abstract (en)

[origin: WO0016580A1] A method for transferring data, in which method data units are transferred between a telecommunication network and mobile stations; the received data units are checked; data units found to be defect are retransmitted, the number of retransmissions is monitored; the number of retransmissions is compared with a predetermined threshold value; and, as a response to exceeding the threshold value, proceedings related to the changes of properties of the bearer are initiated.
