Abstract (en)  
[origin: EP1120376A1] A sheave head (31), provided with a sheave and drive mechanisms, is mounted along the adjustment axis (32) of a jib (10) which can be swiveling based on the swivel drive relative to a lower vehicle body (2). The drive mechanism moves, raises and lowers the jib by winding or unwinding a support cable (25). An independent claim is also included for a pipe-laying vehicle arrangement.
