Abstract (en)
[origin: EP1120520A2] The fitment (20) comprises an abutment for a door hinge connected to the door panel by fastening means comprising a contact bearing face (18) and an adhesive layer (16) which connects the bearing surface and an associated adhesive surface (17) on the door panel. The contact bearing surface comprises a single plane extending parallel to the plane of the associated adhesive surface on the door panel. A two part construction comprises a fixing part (3) having the bearing face and a bearing part (4) connected to support means and adjustable relative to the fixing part.
