Abstract (en)

[origin: EP1120706A2] The information terminal (1) has a processor for preparing the data used for display of the passenger information, which is entered in a memory together with service information and used for controlling a passenger information display (4). A communication interface (20) is linked to the processor for allowing an electronic device (2), e.g. a mobile telephone, personal digital assistant, or portable computer, to communicate with the information terminal.
