Abstract (en)  
[origin: EP1120860A2] The arrangement has first and second contact regions (1,2) for picking up and/or outputting electric current and a transfer region (3) for transferring electric current between the first and second contact regions. The transfer region has first and second end regions (4,5) connected to the contact regions. At least the transfer region is designed so as to form a hollow profile arrangement (6) with the second contact region.
