Abstract (en)

[origin: FR2784298A1] Nasal mask (1) consists of a shell (2) with a nasal chamber (3) and at least two side extensions (4) which press against the wearer's face during use, at least one gas feed port (9) and a connector (6) with a ring (5) for attaching to a harness (14) which holds the mask in place. The shell and side extensions are in one piece and can be made by molding.
