Abstract (en)  
[origin: WO0022251A1] The invention relates to a space frame construction system for three-dimensional positioning of reference points (1). The frame system comprises struts (3) in the form of tubular elements and nodes (2) in the form of spherical elements with a larger diameter than the diameter of the tubular elements, for joining struts. Each node is directly connected via struts to at least three other nodes and the struts (3) are connected to the nodes (2) by means of an adhesive. Each reference point (1) is mounted upon at least one respective node (2).
