Abstract (en)  
[origin: WO0017781A1] A method of constructing a user knowledge profile, having distinct public and private portions with different access restrictions (144), requires assigning a confidence level to content within an electronic document (148). The content is then stored (150) in either the public or private portions of the user knowledge profile dependent upon whether the confidence level exceeds, or falls below, a predetermined threshold level.
