Abstract (en)

[origin: EP1122064A2] In the direction (8) of the sheets' travel in front of the printing zone is a nozzle system (7) formed of annular gap nozzles (16) forming a blower and fixed to a cross-bar (15) attached to a frame. At least several annular gap nozzles point towards the rubber blanket/ form cylinder (11) and are connected to a distributor duct, a feeder duct and an on-off valve with a pressurized air source.
