Abstract (en)  
[origin: EP1122090A1] The rider has a foot part, two holding parts and a locking device consisting of a locking bar (12), locking projection (13), locking surface (14) and locking groove (15) to lock the second holding part to the first one. The locking bar on the second holding part fits the facing bottom edge when locked. The second holding part also has a long hole (11) to allow play for the bottom edge during the locking process.
