Abstract (en)  
Box made of cellulose material, particularly cardboard, particularly solid cardboard, comprising a rectangular bottom panel (2) having a pair of first edges situated opposite each other and a pair of second edges situated opposite each other, having two first upright walls (3a,4a,5a,6a) connected to the first edges via a folding line and two second upright walls (3b,4b,5b,6b) connected to the second edges via a folding line, in which the first (3a,4a,5a,6a) and the second (3b,4b,5b,6b) upright walls each comprise two wall panels that are spaced apart in order to define a hollow wall space there in between, in which the first (3a,4a,5a,6a) upright walls are attached to the bottom panel (2) in a collapsible manner and by means of a glue connection and the second upright walls (3b,4b,5b,6b) are attached to the rest of the box through inter-engaging of second coupling means provided on the second upright walls (3b,4b,5b,6b) and first coupling means provided on the rest of the box.
