Abstract (en)

[origin: EP1122207A1] A slide carriage (5) has at least two outer roller units which are horizontally and movably guided along a support (4). The roller units are spaced apart longitudinally on the support. At least one middle roller unit is positioned between two outer roller units and has at least one guide rail (16) extending as far as a side end part of the support. At least a top roller unit consists of a pair of rollers the load-side roller (13) of which is smaller in diameter than the roller (12) facing away from the load.
