Abstract (en)  
[origin: EP1122371A2] A water closet consist of a closet bowl with an assigned flush tank which can be filled via a filling valve for the provision of flush water and can be emptied via flush knob for the toilet flushing. An additional flushing and wash device with an interruptible wash water line is assigned to the closet bowl. In the flush tank (14) are provided a rising wash water supply line part (30) and a falling wash water supply line connected with this via a transverse line. A high position tube interrupter (31) is assigned to the falling wash water supply line.
