Abstract (en)

[origin: EP1122394A2] The door leaf has a seal (5) for the leaf (1) mounted in a groove (3) in the U-shaped guide profile (4) mounted under the front face (2) of the leaf. The guide profile receives a sealing strip (6) including a support profile (7) for an elastomeric sealing profile (8). The height of the seal in the raised position of the seal strip is smaller than the depth of the groove. The guide profile is positioned so that the lower front face of the door extends over the seal.
