Abstract (en)
[origin: EP1122488A1] The light has a light source and a wavelength dependent filter with a selectively transmissive filter and/or a selectively reflective mirror reflector for filtering out color components of light from the lamp, whose position on a standard color table is opposite to the body color to be accentuated on a line through the no-color point. The filter also filters out a part of the color component of the body color to be accentuated.
