Abstract (en)
[origin: US2001039139A1] An insulation-displacement terminal contact (1), for example for modular terminals, which has a slotted, sprung contact region as a contact-making slot (3) on a connecting bracket (2), which contact region is surrounded and reinforced by an outer spring clip (4), and which insulation-displacement terminal contact (1) has cutting blades (6) in the inlet region (5). The invention provides for the cutting blades (6) to project toward one another behind their inlet region (5).
