Abstract (en)

[origin: DE19961920A1] The method involves entering a target telephone number at least once into the inverter, a mobile communications device or a computer, using an infrared link between the inverter and communications device to describe and/or read inverter parameters, establishing a connection from the mobile device to the target telephone number and exchanging data with the device, e.g. a PC, reached using the number. Independent claims are also included for the following: an inverter for use with a method of remote setting to work, maintenance, parameterizing and/or operation.
