Abstract (en)
[origin: WO0007489A1] The invention relates to a basin-shaped element, especially a shower pan or bathtub, which is constructed as a plastic injection molded part. In addition, the inventive element comprises an injection molded material thickness (2, 4, 5) which is designed for supporting people located on or in the element. The invention is advantageous in that no additional materials and work are necessary in order to obtain an adequate stability. In addition, no materials need to be separated when disposing of the element.
