Abstract (en)
[origin: WO0023370A1] A winder apparatus for winding spandex through independent threadline paths for stacked winders and a method utilizing such apparatus are provided. The apparatus comprises means for independently directing a first plurality of spandex threadlines (4A) to an upper winder (3A) and a second plurality of spandex threadlines (4B) to a lower winder (3B), the first and second plurality of threadlines being in alternative relationship to each other, each tubecore (1A) mounted on the upper winder being axially displaced from a corresponding tubecore (1B) mounted on the lower winder by about 1/2 tubecore length.
