Abstract (en)

[origin: WO0023557A1] The invention relates to a combination comprised of one or more washing and cleaning agent shaped bodies, which contain(s) a percarbonate bleaching agent, and comprised of a packaging system containing the washing and cleaning agent shaped bodies. Said packaging system has a moisture-vapor permeability rate which ranges from 0.1 g/m<2>/day to less than 20 g/m<2>/day when the packaging system is stored at a temperature of 23 DEG C and at a relative equilibrium moisture of 85 %. In combinations of this type, the washing and cleaning agent shaped bodies have a high degree of hardness and short disintegration times.
