Abstract (en)  
[origin: DE19939429A1] The invention relates to a fuel injection device (1), comprising one or more pump-nozzle units or pump-line-nozzle systems (6) that correspond to the number of cylinders and that compress the fuel. The fuel injection device is also provided with a hydraulic pressure multiplicator (10). The inventive device facilitates fuel injection over a wide speed range and with high precision using the pump-nozzle unit (6) and the pressure multiplicator (10).
