Abstract (en)

[origin: DE19848525A1] The invention relates to an assembly for cable conduits of a piece of workstation furniture comprised of a plurality of different profile sections which can be inserted into one another, which comprise essentially planar outer sides, and which support connecting elements or connecting grooves, said elements or grooves being formed on the inner sides. The assembly comprises four different profile sections a curved wall profile section, a side wall profile section, a wall termination profile section, and a cover profile section which can be inserted into one another to form different cable conduit structures using simple insertion elements.
