Abstract (en)

[origin: EP1123749A1] The system has a cabin with a V-shaped lower part, a lower collection channel (13) connected to a suction device (2) and two ends (10,11) with openings for workpieces. The collection channel is covered by at least one accessible and alignable base plate (17) with suction slots in at least one of both longitudinal sides and at least one suction opening or slot inside the base plate. The base plate can be hinged up and fixed in this position.
