Abstract (en)
[origin: EP1123879A1] System capable of being governed entirely by a computer, which permits the complete handling of a warehouse right from the entry of merchandise from suppliers up to its delivery to the customer, in the quantities and types of merchandise that may be specified. This requires the systems of storage and cargo breaking of the invention, which are interconnected in such a way as to permit the integrated handling of goods in the warehouse. <IMAGE>
