Abstract (en)

The present invention relates to a non-staining lubricating composition for use in metal working machines, comprising, based on the total weight of the composition, from 1 to 99,5% of a benzene alkylate. The invention also relates to a process for rolling stainless steel, copper, copper alloys, aluminium and aluminium alloys and to the use of the non-staining lubricating composition to lubricate the moving or turning parts of a stainless steel, copper, copper alloys, aluminium and aluminium alloys rolling mill. <IMAGE>
