Abstract (en)

[origin: EP1124018A2] The assembly to mount the connections (1,2) for hot and cold water, at a partition wall (3), has a connector (7) for each which passes through openings, with an inner threading (9) to take a screwed pipe, and an outer threading (10) for two clamping nuts (11) which clamp the partition wall (3) between them. The connector (7) has a polygonal cross section, and preferably an octagon, and a common support plate (12) with shaped passage openings (13) to give a positive fit with the cross section of the connectors (7).
