Abstract (en)

An efficient lamp (10) includes a reflector (40), a filament (60), a reflective disc (20) and a lens (70). The filament (60) emits light that is reflected out the lens (70) by the reflector (40) and the reflective disc (20). The reflective disc (20) increases the efficiency of the lamp by reducing the amount of light that is absorbed by the reflector. <IMAGE>
