Abstract (en)

Camouflage arrangement applicable onto antenna masts for communications or similar, consisting of truncated-cone-shaped (2), cylindrical (2'), polygonal or similar (2'') bodies fixed at ground by means of an anchoring plate (5) and having an opening on the lower section (10) for inlet and outlet of cables, communicating with an underground channeling (12), or aerial channel if open air equipments are used, the bodies (2), (2') and (2'') being coated with a plastic covering (4) outwardly presenting a tree bark appearance, bonded by means of adhesives or artificial means, the support (2), (2') and (2'') being capable of being composed of parts joined each other or welded, the upper part having protuberances on which artificial main branches (6) are fixed, and on which secondary artificial branches (6'') are also fixed, and a body configured like a top (7) having also artificial main branches (6'), and, on these, secondary artificial branches (6''). The antennae (40), fixed on appropriate supports are installed on the top (7).
