Abstract (en)
[origin: WO0115534A1] An insecticidal composition is disclosed that includes Tasmannia stipitata extract in combination with an insecticidally effective oil such as petroleum oil, vegetable oil, and fish oil. The Tasmannia stipitata extract enhances the insecticidal activity of these oils. It is particularly useful against a variety of insect pests that occur on plants such as thrips, aphids, mites, scales and caterpillars. It is also useful against lice and flies.
